BIO RECHERCHE

Indian origins and my French culture, I first imagined a creation of luxurious natural ingredients, after which I introduced an oriental and delicate female fragrance. La Femme counterbalanced it by a fresher and more masculine aroma for L' Homme," explains the 30-year old entrepreneur. She is looking for like-minded distributors in India to bring the fragrance range to our country. For further details log on to www.sahlini.com

DETAILLE - 1905

Quaint yet deliciously scented period décor interiors of Detaille-1905 carry forward the tradition of Parisian perfume shop. What intrigued us was the charming aristocratic history of the brand. "Countess de Presle having bought one of the first cars in the early years of the 20th century felt her skin dehydrate due to the car's high speed. She discussed the matter with one of her friends, the chemist Marcellin Berthelot, who created a hydrating lotion, which she called Baume Automobile. That was the starting point of a range of high quality body products, the Preparations de Beauté, which were sold in all of Europe's courts. Thus was established Maison Detaille in 1905, named after the Countess' husband," explains owner Louis Pallier, Today Detaille products continue to be produced with the same formulas, passed down from generation to generation. The products are delicate, made of precious raw materials and assure long lasting effects. While the fragrances truly have a royal air. around them, the beauty products entice with their simple yet exotic blends and packaging. Their natural mineral powders are famed to be magical. The real Detaille powder retains the traditional formula dating back to 1900, in its gold and iridescent box containing a sieve and powder puff. No wonder that several popular actresses are the brand's loyal patrons. For more log on to www.detaille.com
